WX600P Series Subclasses

WX664P-01

Versatile machines for multiple applications (plain seaming, covering, hemming)

- For plain seaming light to medium weight fabrics such as T-shirts and polo shirts.

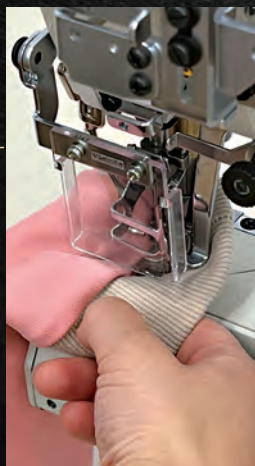

Basic model of the WX600P Series. Can be used in various applications with attachments.

WX664P-35

Hemming

- For hemming tubular-shaped bottoms of light to medium weight fabric such as T-shirts and polo shirts.

The fabric trimmer (FT device/standard accessory) positioned to the left of the needle trims the fabric edge neatly during sewing to produce clean finished products.

WX664AHP-03

Short-bed Covering

- For covering leg openings of swimsuits or other clothing and medium weight fabrics such as sweatshirts.

The short distance from the needle drop hole to the end of the cylinder bed facilitates fabric handling. Placing and removing the fabric is easy thanks to the left side being shorter, which helps achieve higher quality of finished products and improved work efficiency.
