## Expanding the PEGASUS' factory in Vietnam

Completion ceremony on July 22 (Fri.), 2011

PEGASUS VIETNAM SEWING MACHINE CO., LTD. (located in Hai Duong Province in North Vietnam; hereinafter called PEGASUS VIETNAM), which is one of overseas manufacturing companies of PEGASUS SEWING MACHINE MFG. CO., LTD. (Headquarters: Osaka, Japan, President: Moriaki Shimizu), constructed a new factory building on the existing site, in order to increase the production capacity for industrial Kan-nui (chainstitching) machines.

PEGASUS VIETNAM, which is a production base in addition to the Shiga factory in Japan and PEGASUS (TIANJIN) SEWING MACHINE CO., LTD. in China, has been conducting production activities by specializing in assembling PEGASUS' standard class overedgers and interlock stitch machines since the establishment in 2008.

Thanks to this new factory, the factory scale of PEGASUS VIETNAM became 2.6 times the size of the old factory and it is now better prepared to increase production capacity, achieving start-to-finish manufacturing from producing parts to the final operation of assembling machines.

The PEGASUS GROUP will enhance our competitiveness by increasing the production capacity of PEGASUS VIETNAM, by working hard on the mass-production of new models in addition to conventional models.

To celebrate the completion of the new factory building, PEGASUS VIETNAM held a completion ceremony at the factory site on July 22 (Fri.), with the attendance of a total of about 140 people, including the board members of the headquarters and other persons concerned, etc.

For details regarding the expansion of PEGASUS' factory in VIETNAM, please see the attached sheet.
