

# JIAM 2024 OSAKA

## Japan International Apparel & Non-Apparel Manufacturing Technology Trade Show

November 27 (Wed.) ~ November 30 (Sat.)

at INTEX OSAKA in Japan.

PEGASUS CO., LTD. (Headquarters: Fukushima-ku, Osaka, Japan; President: Shigemi Mima, will be participating with a booth at the 13th Japan International Apparel Machinery and Textile Industry Trade Show (JIAM 2024 OSAKA). This event will be held for four days, from November 27 (Wed.) through 30 (Sat.) at INTEX OSAKA in Japan.

This exhibition is one of the world's leading trade shows for the development of the apparel and textile industry. PEGASUS will be exhibiting state-of-the-art machinery and solutions that are in line with the exhibition theme of “It all connects at JIAM - the forefront of technology and master craftsmanship.

The main exhibits and products of interest are as follows,

### MX (T) neo series

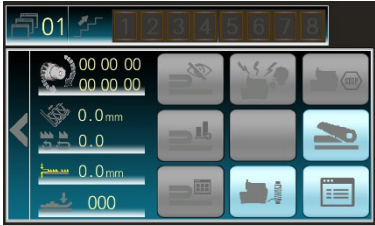

The MX(T)neo series, PEGASUS' flagship model, will be upgraded with a long-awaited integrated electrical system, and a new robot mascot will be unveiled at the exhibition.

<p><b>[NEW] MX neo series</b> Built-in electrical equipment integrated type overlock</p>	<p><b>MXT neo series</b> Variable top feed overlock</p>
	

### Production efficiency

In the Production Efficiency Corner, we will exhibit Digitally controlled sewing machines as an intelligent and advanced solution for the times when the optimum sewing conditions right amount of production and the right amount of consumption are required. We will demonstrate an item changeover sewing demonstration titled “Digital Sewing Machine Revolution.” Other exhibited machines will showcase products that de-skill, stabilize quality and improve production efficiency.

<p><b>【Trial】 Digital control sewing machine</b></p>	<p><b>SOH-500 series</b> Automatic unit for hemming operation on flat sleeves</p>
	

### Versatile

Versatile corner is Demonstration of sewing machines that can be used for multiple functions. We will demonstrate the versatile use of short cylinder bed type interlock machines and cylinder bed type overlock machines.

<p><b>【NEW】 WX664AHP series</b> Short cylinder bed type interlock stitch machine</p>	<p><b>EXT5100 series</b> Variable top feed, cylinder bed overlock</p>
 	 

### Non-apparel

The year 2024 marks our company's 110th anniversary year. Through this exhibition, we will introduce our other businesses, such as, Automotive parts, and exhibit non-apparel sewing machines

<p><b>【Trial】 TML326 series</b> Digital control sewing machine Cross Stitch</p>	<p><b>EX Series</b> For decorative overedging for carpets</p>
	

In this section, we will present progress management software that encourages wellbeing of the management in sewing factories.

Progress Management Software	
	<p>With Pegmo, you can monitor the progress, production volume and bottlenecks at your production site from your smartphone no matter where you are. Providing respective benefits that sewing operators, maintenance managers, and plant managers can gain from using “Pegmo” .</p>
