

【New products】 MXneo series release

(Intelligent integrated Overlock & safety stitch machines)

PEGASUS CO., LTD. (Headquarters: Fukushima-ku, Osaka, Japan; President: Shigemi Mima) will release MXneo series (Intelligent integrated Overlock & safety stitch machines) on July, 2025.

The newly released MXneo series features a compact design that integrates the sewing machine body, operation panel, and control box into a single unit, marking a significant evolution from the previous MX series.

The overview of the newly reborn "Built-in Integrated Sewing Machine MXneo Series" is as follows.

■ Product Overview

The MXneo series offers two models: the "Basic Function Type (D422)" and the "Multi-Function Type (D432, D442)."

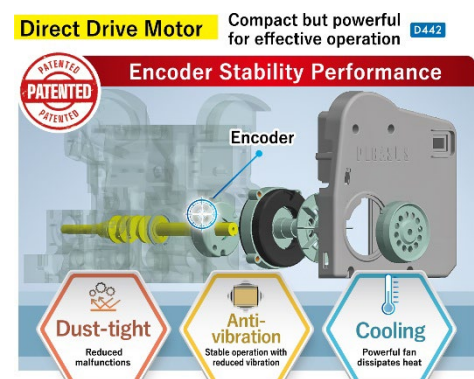

*Basic Function Type (D422)

This is a standard model equipped with a direct-drive motor. While simple in design, it offers high basic performance and ensures stable sewing operations. (1)

*Multi-Function Type (D432, D442)

Equipped with a high-performance direct-drive motor that excels in dustproof and vibration-resistant capabilities. The motor offers extremely fast startup and shutdown, enhancing responsiveness from the beginning to the end of sewing operations, resulting in smoother and more efficient work.

Furthermore, it comes equipped with a wide range of standard features, including a presser foot lifting function, automatic thread trimming controlled by sensors, an air-powered dust collector, air-saving functionality, and a safety sensor to prevent malfunctions.

Additionally, user-friendly features include voice guidance in eight languages (2).

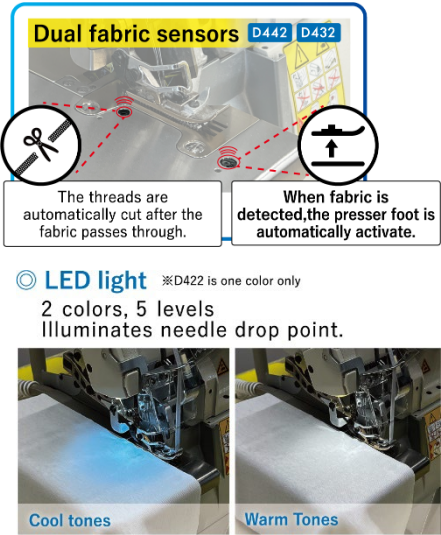

To support a comfortable working environment, it also features a two-color, five-level adjustable LED light that can be tailored to the fabric being sewn.

******(1) Optional features such as the presser foot lifting function, sensor-controlled automatic thread trimming, and air-powered dust collector can be added.

(2) Voice guidance supports eight languages: English, Chinese, Turkish, Spanish, Bengali, Vietnamese, Portuguese, and Indonesian.

Please note that the available features may vary depending on the subclass. For detailed information, please refer to the catalog on our company website. Additionally, the product features and specifications mentioned above are subject to change without prior notice for the purpose of improvement. We appreciate your understanding.

■ Release Date
July 2025
