## 1. Qualitative information of the consolidated performance for the three months

#### (1) Operating results

During the first quarter of the current consolidated cumulative period, the spread of the new coronavirus infection was being suppressed by the progress of vaccination, and the global economy was on a recovery trend because of additional economic measures centered on the United States and Europe.

In the industrial sewing machine industry, which is the main business of our group, demand for capital investment is increasing in China at the lead, North and Central America and some parts of Southeast Asia.

In the die casting auto parts business, demand for automobiles was recovering rapidly, but it was affected by the suspension or delay of automobile production due to the global shortage of semiconductor supply.

Under these circumstances, net sales for the first quarter of the current consolidated cumulative period were 5,001 million yen (up 51.8% from the same quarter of the previous year), operating profit was 262 million yen (operating loss was 230 million yen in the same quarter of the previous year), ordinary profit was 261 million yen (ordinary loss was 134 million yen in the same quarter of the previous year), and profit attributable to owners of parent was 180 million yen (quarterly loss attributable to owners of parent was 213 million yen in the same quarter of the previous year).

#### Business overviews by segment

(Industrial sewing machine)

Regarding industrial sewing machines, owing to capital investments with the recovery of demand in the United States and Europe, which are the main consumers of apparel, sales were 4,051 million yen (up 51.0% from the same quarter of the previous year) and segment income was 460 million yen (up 1,330.2% from the same quarter of the previous year).

#### (Die casting auto parts)

Regarding die casting auto parts, due to the strengthening of sales activities aimed at expanding sales channels, sales were 950 million yen (up 55.4% from the same quarter of the previous year) and segment income was 73 million yen (up 288.6% from the same quarter of the previous year).

#### (2) Consolidated earning forecasts

The earnings forecast has not been changed since the last announcement in May 14, 2021.
